Knowledge Acquisition, Building Competencies & Demonstrating Outcomes

Certificate In Project Management (CIPM) is ISO/IEC 17024:2012 accredited and administered by International Institute of Projects & Program Management (i2P2M).

i2P2M - International Institute of Projects and Program Management, a non-profit company, was incorporated in 2008 as a Section 8 company. The company's vision is to equip project leaders, managers and professionals across central / state government, public & private sector companies and research institutions in nurturing project mindset to better manage the ever increasing complexities. Its aim is to enhance their Knowledge, building Competencies and demonstrating Outcomes through comprehensive learning that can be applied at the workplace, exposure to best practices, relevant case studies, real time computer based simulations of complex project and leadership scenarios and sharing of experience / success stories by industry stalwarts from India and abroad.

i2P2M has two major streams – Project Management Certifications and building competencies through various Executive Diploma programs.

- International Executive Diploma in Project Management (IEDPM) in association with the School of Business of the George Washington University (GWU), Washington D.C., USA. There are 5 levels to acquire IEDPM. Level 5 of 5 days is done at GWU. The total duration is of 15 days.
- Executive Diploma in Project Management (EDPM) Hybrid program covering Levels 1 to 4. The total duration is of 10 days.
- **Executive Diploma in Project Management EDPM covering Levels 1 to 4. The total duration is of 6 days in physical mode. It is a version of EDPM program**

Level 1 is the foundation program covering Totality of Project Management. This prepare for the Certificate In Project Management (CIPM) which is ISO/IEC 17024:2012 accredited by NABCB of QCI, Government of India. **Levels 2 to 4** of **EDPM** workshop is on risk management, real time computer simulation program from UK and wisdom sharing by international stalwarts. At the end of the diploma program, participants evolve a combined action plan for implementation at their workplace. It is a powerful 6 days program.

Totally of Project Management (TPM) covers 8 Project Life Cycle Phases, 37 Knowledge Areas and 127 Concepts.

Some Feedback

Superb faculty and excellent exposure, best learning experience and massive gain in knowledge of project management.

- Dr. Deepak Mishra, **SAC, ISRO**

Level 1 TPM **course is awesome**

- Pooja Yadav, **SAG, DRDO**

8 Project Life Cycle Phases of TPM is in line with NITI Aayog's recommendations for project management curriculum

TPM covers eight Project Life Cycle (PLC) phases – Conceptualize, Plan, Organize, Implement, Control, Integrate, Deliver & Closeout and Knowledge Leverage. Each phase has been depicted using different colors of varying intensity showing the intensity of the work during that phase. Three additional Project Life Cycle phases **Organize**, **Integrate**, **Knowledge Leverage** were introduced first time globally. The additional 3 project life cycle phases is added to conventional 5 project life cycle phases used by other global PM associations. Totality of Project Management is most unique globally. CEPM provides project management training based on the syllabus provided by i2P2M which administers the Certificate In Project Management (CIPM) Exam

Some of the 37 Knowledge Areas covered in Totality of Project Management (TPM) are: Stakeholder Management, Need Analysis, Business Case, Success Criteria, Scope Definition, Time Management, Cost & Finance, Project Management Plan, Roles & Responsibilities, Risk & Opportunity, Procurement, Quality, Information Management & Reporting, Contract Administration, Communication, Organization Structures, Leadership, Motivation, Conflict Resolution, Team Performance, Negotiation, Change Management, Issue Management, Problem Solving, Internal & External Interfaces, Closeout, Post Project Evaluation, Agile methodology, Health, Safety, Environment, CSR etc.

Excerpts from NITI Aayog Task Force Report on project management :

"The curriculum to address following knowledge areas for project management and should consider the project from concept to commissioning encompassing all life cycle phases i.e. Conceptualize, Plan, Organize, Implement, Control, Integrate, Deliver/closeout and Knowledge Leverage".

Totally of Project Management is in line with NITI Aayog's above recommendation.

International Institute of Projects and Program Management (i2P2M) will hold the 2.5 hour Certificate In Project Management (CIPM) exam on

Resource Person

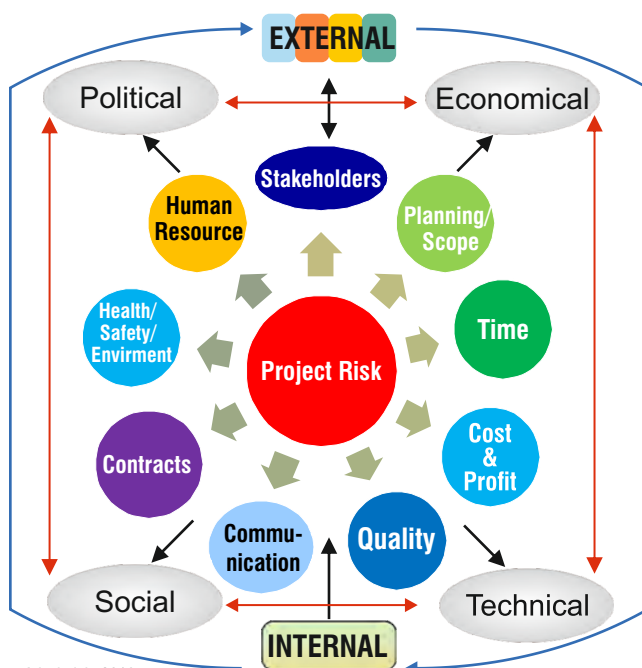

Adesh Jain

Adesh Jain is the Chairman, International Institute of Projects and Program Management (i2P2M), a not for profit company and Founder of World Project Management Forum (WPMF). He holds a Bachelor of Electrical Engineering from the Indian Institute of Science, Bangalore in 1965 and Master of Engineering from Canada in 1967. He worked in Canada till 1973 and decided to return to India. In 1978, he was heading one of the 7 divisions of BHEL. In 1992, he formed the Centre for Excellence in Project Management (CEPM) with an aim of creating a project oriented India.

He was invited twice to give presentations at the NASA PM Challenge Conferences in 2010 and 2012 on 'Breaking boundaries - the key to innovation' and 'Awakening of project consciousness through stakeholders buy-in' respectively. Recognizing his global contribution in project management, Government of Turkey released a postal stamp in Adesh Jain his honor in November 2010. He is often referred to as Bhisma Pitamah of Project Management. **In short, he is a visionary leader shaping the PM profession globally.**

Projects are taken up to build the future and have many uncertainties. Risk is, therefore, at the center stage of managing projects. Risk management is 70% of project management. Diverse interests of stakeholders contribute significantly to project risks. Along with Risk management concepts some success stories in managing risks will also be covered. As shown in Figure-1, Risk Is Everywhere (RIE). Risk is uncertainty that matters.

**Risks are those
uncertainties that matter**

risks we take and risks we face

*Being proactive in risk is
least risky*

*Create new possible futures by viewing risks
- both threats and opportunities*

**Managing uncertainties
requires Risk Mindset**

Project Risk Management covers :

- Enterprise Risk Management Models - COSO, ISO 31500, IRM
- Risk Identification and Categorisation - Tools and Methodologies
- Risk Evaluation and Quantification
- Possible Risk Response and Mitigation Strategies
- Risk Control Processes

Some other topics covered in this module of project risk management are : Decision making, Responsibilities, Gross and net risks, Risk identification techniques, Risk quantification processes, Types of mitigation strategies, Benchmarking and scenario analysis, Probability impact grid, Monte Carlo simulation, EVA, Life cycle costing, Transparency of risks, Respect for risks, Complete templates for risk identification, quantification, response development and control, Impact of risks on formulation of budgets and risk documentation.

Average Score of 2250+ Professionals
in Intro CrtPRM Exam in %

Average Score of 2250+ Professionals
in Pre Test at the start of Project Risk
Management 1 day program.

As per the previous project risk management programs, on average there was an improvement in the knowledge level of a participant by a factor of 2.4 times. We conduct an initial assessment before the program begins related to risk management. The average score of this initial assessment is then compared with the average score of the participants after going through the Introductory Certificate in Project Risk Management examination. Improvement by a factor of 2.4 is a massive gain just after going through a day long risk management program which covers 7 risk management processes.

Project Risk Management gives you in brief the major take always from each of the seven Risk Management Processes. It gives you an excellent holistic view of the importance of risk management in managing complexities of projects.

Introductory Certificate in Project Risk Management (Intro CrtPRM) Examination
Bengaluru - 09 January 2025 from 4.30 to 5.30 pm

Since the launch of Certificate in Risk Management credential in 2011, as on date there are over 2250+ professionals across 11 countries from 185+ companies across all sectors with CrtPRM certification. India is one of the few countries where we have a specialised certificate in project risk management.

EDPM i2P2M has introduced a project risk management credential Introductory Certificate in Project Risk Management (Intro CrtPRM). The exam will cover all the seven risk management processes given on previous page.

Computer Based Real Time Simulation Program from UK
on Project Leadership

Timing : 9.30 am to 5.30 pm

Bengaluru : 10 January 2025, THE FERN Residency Yeshwanthpur

Three compelling advantages in using simulation program from Prendo, UK

- INSIGHT-** the simulations ensure profound understanding by giving users chance to see 'both cause and effect'.
- FORESIGHT** - the simulations provide hands on experience to reduce the risk of making mistakes in the real world.
- EFFICIENCY** - the simulations provide accelerated experiences ensuring fast, effective and accessible learning.

Simulation provides an excellent experiential learning

People learn by doing

Complex skills can only be developed by (a) making decisions or taking actions, (b) experiencing the consequences, and then (c) figuring out what happened and why, and then repeating the process, i.e. practising.

Simulations are better than real world experience

In contrast with using real projects and real organisations as their practice grounds, when mistakes can be very expensive, simulations are faster, lower risk, lower cost, and crucially, more effective because they make the link between cause and effect easier to see.

Simulations are essential in many professions

Pilots, military strategists and surgeons, for example, have long understood the importance of simulating their activities in order to improve their performance and reduce the risk of failure in the real world.

Leaders face many challenges in the modern world, including working with increasing levels of complexity and ambiguity, accelerating levels of change and uncertainty, as well as ongoing pressure to act responsibly and ultimately, to create value. The most powerful learning method to address these many challenges is advanced simulation, because **participants must take decisions and can see the consequences.**

Lectures are effective ways of sharing information. Case study discussions go further, but still don't force participants to take decisions or see the consequences. None of these methods provoke any memorable emotional reaction. The next generation of leaders in particular are looking for live experience through project management simulations like pilots do through flight simulators.

Prendo's simulations are used by many global organizations and leading business schools, including:

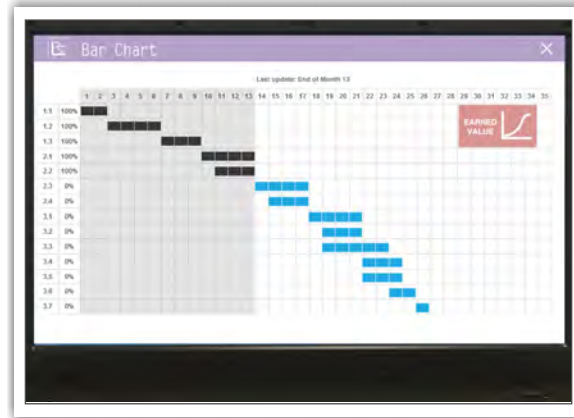

Some comments from participants

- The simulation exercise is a class of its kind never experienced before. I would like to thank i2P2M for including simulation exercises. It is a great experience. I2P2M is the only company in the world which includes real time simulation programs. Hats off to them.
- It was a life time experience, having fun as well as learning. It gave many insights and sharpened my opinions. It also opened many closed windows.
- Awesome and creative way of learning and understanding from the stage of formulation to completion.

Real Time Simulation on Project Leadership from UK

Out of 12 stakeholders, Banker, Head of Design Team and CEO giving their opinion on the business case as proposed by the team

Project monitoring through Bar chart to control Time, Scope, Risk, Cost, Quality and maximising stakeholder's satisfaction

The real time simulation on Project Leadership construction project to be completed in 23/24 months within 50 million pounds and satisfying 12 different stakeholders.

The "3 years in 1 day" real time simulation will take you across all the project life cycle phases which in real live situation will take 3 years from planning to completion. Often, a team member does not get an opportunity to work from the stage of conceptualisation to project closure. It is an intense, but risk-free experience that will help them develop skills in the key topics as given below.

Developed with inputs from the Major Projects Association, UK the simulation brings to life many key themes of advanced project management, including:

- project success: what is it, and what causes it
- project complexity and uncertainty
- the "art" of project management

KEY TOPICS

- Advanced project management
- Teamwork
- Stakeholder management
- Managing risk & uncertainty
- Implementing strategy
- Complexity & ambiguity

LEARNING OUTCOMES

- define project success
- analyse and manage risks
- manage the early stages of a project
- judge stakeholder-driven trade-offs
- develop an optimal contract strategy
- juggle & integrate multiple disciplines
- plan & control a project
- take decisions in a complex scenario

Team Score Range -100 to +100 Marks
(Team score will be normalised to 200 Marks)

Project Leadership

There are twelve key persons who are associated with this project. The team challenge is to demonstrate project leadership to maximise the overall satisfaction of these 12 key stakeholders, timely completion of the project within cost and with good profitability.

Wisdom Sharing (9.00 am to 12.00 pm)

Belgium  Germany  India 

Dr. Hans Stromeyer (Germany) is co-founder & President of the International Association of Project Managers (IAPM). Before that, he was Director of Science Services and International Programs at SPACEHAB, Inc. in Houston. The company developed and operated manned modules in the payload bay of the American Space Shuttle. He was recipient of the prize of the German Project Management Award as well as the Award of Space Missions D1 & D2.

Oliver Maeckel (Germany) is Vice President and Partner at Siemens Advanta Consulting, Germany. He has been with Siemens AG since 1997. The focus of his current work is, in particular, the development and delivery of “first-of-its-kind” large-scale projects and especially the digitization of project business processes. He and his team have supported more than 200 major and mega projects.

Antonio Nieto-Rodriguez (Belgium) is the Author of the Harvard Business Review Project Management Handbook, the HBR article The Project Economy Has Arrived, and four other books, Antonio is the creator of concepts such as the Project Economy and the Project Manifesto. His research and global impact in modern management have been recognized by Thinkers50. Fellow and Former Chairman of the Project Management Institute, and is the co-founder of the Strategy Implementation Institute.

Adesh Jain (India)
Chairman i2P2M & Founder of WPMF

The word ‘Project Mindset’ was coined and introduced by Adesh Jain in August 1999 in Stockholm, Sweden while giving a one day seminar on “Project Mindset – the Key to Competitiveness”. In last 20 years, lot of development has taken place in refining the conceptual framework of ‘Project Mindset’. A thought provoking presentation will be given to the participants with the latest conceptual framework of the role played by a Project Mindset in managing projects.

The first 3 Wisdom Sharing sessions from outside India shall be through video recording moderated by Adesh Jain.

Topic: Hybrid Project Management

Project Management is in a period of adaptation to our VUCA world. Today, projects aim to be more responsive to unclear customer demands. This development was spearheaded by the Agile Manifesto proclaimed by leading software developers in the USA. Scrum and other frameworks have rapidly gained attraction worldwide, prompting traditional projects to include agile mindset and methods. Hybrid project modeling allows combining classic and agile elements intuitively.

Topic: Mega projects – raw diamonds or raw eggs?

Mega projects are raw eggs, developed well they will change to be raw diamonds instead. The number of large projects continues to grow over the last decades. Nonetheless, these projects are more than often the first of their kind and therefore moving the final frontier. Scaling up things and working in this area is often risky due to many new situations and uncertainties. Planned creation and excellent execution, the eggs will become diamonds.

Topic: The Project Economy Has Arrived, and Why Project Management Had to Be Reinvented

Today, about 70% of projects fail to deliver their objectives. Considering that every year approximately 48 trillion US dollars are invested in projects, we fail to deliver trillions of benefits, value, and impact in organizations and society at large. If we increase our success ratio from 30% to 60%? Just imaging the amount of value that we would be adding to the world, approximately the GDP of China in extra benefit. To achieve this incredible goal, project management and projects managers will need to reinvent themselves.

Topic : Agility in Transforming MINDSET to New Realities

Collective Action Plan (12.00 to 5.00 pm)

After going through the 4 Levels of EDPM workshop, a participant will on average improve their knowledge base by a factor of 2 to 3 times in both project management (Level 1) and risk management (Level 2). This ensures a solid foundation in applying the enhanced knowledge at one’s workplace. Further, the experiential learning through real time simulations in Level 3 further prepares the participants to apply the knowledge gained in effectively handling complex projects. Level 4 focuses on international sharing of wisdom with case studies acquired through managing diverse set of projects by global thought leaders.

With the involvement of all participants, the facilitator will create a list of recommendations for each of the 4 levels i.e., 1 to 4. Facilitator will ask the participants to select the 2 most relevant recommendations for their respective companies for each of levels. Based on these collective recommendations, the facilitator will then create a short list of 4 recommendations for each of the Levels (1 to 4).

The senior management of various participating companies in EDPM workshop will then get a list of both the generic recommendations and the company specific recommendations for each of the 4 Levels.

We expect that management will examine the recommendations carefully and select 1 or 2 recommendations to implement in their organisation. The participants from their company in EDPM program typically act as internal consultant advising senior management.

The most unique USP of EDPM program since its inaugural launch in 2011 is **to transform competency development to measurable benefits for the organisation.**

EDPM 6 Days workshop covering 4 Levels

Registration Fee

Per Person : INR 1.15 Lacs plus GST @ 18%

For 3 to 14 Persons : INR 77,000 per person plus GST @ 18%
